Re: Co-op/Intern, Full-Stack Developer - January to April 2025 Position

Dear Hiring Manager,

I am excited to apply for the Co-op/Intern Full-Stack Developer position at BDO Digital for January to April 2025. As a Master of Applied Computing student at the University of Windsor, I have gained substantial experience in full-stack development and cloud technologies that align closely with the responsibilities outlined in this role. I am particularly drawn to BDO's reputation for fostering a people-first culture and its commitment to innovation and professional growth.

During my internship at Avea Media Labs, I developed and integrated software solutions using various IoT devices, which enhanced my skills in real-time data processing and communication protocols. I built a real-time environmental monitoring system, integrating MySQL for data management and utilizing MQTT for reliable device communication. This hands-on experience has provided me with a strong foundation in building robust software systems and effectively managing databases.

Additionally, I have worked on full-stack development projects utilizing technologies such as Node.js, React, and MySQL, where I designed and implemented responsive web applications. My experience with cloud platforms like AWS and my exposure to AI-driven tools, particularly with Python, have further refined my ability to develop innovative solutions and adapt to new technologies quickly.

I am eager to contribute to BDO's AppDev team by leveraging my skills in JavaScript and cloud computing to create impactful software solutions. I am also enthusiastic about participating in your innovation program and gaining exposure to GenAI with Azure OpenAI, which perfectly aligns with my interest in artificial intelligence.

I am confident that my technical skills, coupled with my passion for solving complex problems and my dedication to professional growth, make me a strong candidate for this internship. I am excited about the possibility of discussing how my background and skills align with the goals of BDO Digital. Thank you for considering my application.

Sincerely,

Dhaval Khunt
