Re: Application for Co-op/Intern, SR&ED (January to April 2025) at BDO Canada

Dear Hiring Manager,

I am writing to express my interest in the Co-op or Intern, SR&ED position at BDO Canada for the January to April 2025 term. With a strong foundation in software engineering and hands-on experience in research, development, and system optimization, I am confident in my ability to contribute to your SR&ED team. I am currently pursuing my Master of Applied Computing at the University of Windsor, where I have developed technical expertise and practical knowledge in programming, cloud platforms, and project execution.

During my internship at Avea Media Labs, I worked extensively with IoT technologies, focusing on MQTT protocol and embedded software development. This experience sharpened my skills in assessing technical challenges and implementing real-time data communication solutions—key aspects that align well with the responsibilities of this role. My background in C, C++, and cloud technologies has enabled me to work effectively with multidisciplinary teams, much like the collaboration required for preparing SR&ED claims and managing client projects.

At BDO, I am excited about the opportunity to assess technical eligibility, work on innovative projects in the technology and software industry, and contribute to the firm's client engagements. I possess the skills needed to prepare technical reports, identify process improvements, and maximize tax incentives for clients, while being able to communicate technical challenges in a clear and compelling manner.

The culture of respect, inclusion, and professional development at BDO is particularly appealing to me, as I thrive in environments where personal and professional growth is supported. I am eager to bring my strong technical skills, client-focused mindset, and passion for innovation to BDO Canada, contributing to the success of your SR&ED team and the broader Technology and Life Sciences group.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the goals of BDO Canada.

Sincerely,

Dhaval Khunt
